

Lead with Your Words

“Being a Safety Leader”

Those around you take cues on what is important to you directly from what you talk about, which is why it’s critically important that you talk about safety. Safety doesn’t have to be forced into every conversation, however when an urgent or important issue arises and you make mention of safety, it sends a clear message to everyone around you that safety is important. Safety is a value and should therefore be a part of daily conversation.

Remember: “No task is so important that it be done at the risk of Safety.”
